HTML, CSS & JS Challenge

zaio

Note

Please make sure you have been placed into your team and have good clarity on how group upskilling at Zaio works. Bear in mind, each developer will have to submit their own solution, but can consult one another in the team when stuck.

zaio

Specification

Create page using HTML, CSS,bootstrap and JavaScript a page that looks like the one on the next page. The Page must be aligned in the Centre. When the user selects a specific colour, the value of the colour on the COLOR label must change. You can name the colours whatever colours you want.

When add to cart is clicked, a modal should pop asking the user to input the quantity of the item he/she wants. The 'Agree' and 'Cancel' button should be placed as shown in the image below. When agree is clicked, the pop should close and the 'Add to Cart' button must now say 'Checkout now'. For more details see the images below.

Shipping & Returns

The pop or modal should look as the one shown above. If the user selected Electric Red as the colour the colour has to show in the modal. The user can then increment and decrement how many electric reds he/she wants and when the user hits 'Agree', the modal will close and the Number will be updated on left side of the 'Add to cart' button and the value of the 'Add to cart' button will change to 'Check out now'.

Then on the details section the chosen colour circle should appear in a line as many times as the quantity selected. Final Screen shown on next page

Submission

Please ensure your submission caters to all points in the Rubrik (next slide).

Host your challenge online using a hosting service and ensure that its mobile optimised.

On the whatsapp group, you submit the following:
- The link to the hosted solution (website)
- The link to your github profile (code needs to be pushed to github for analysis)

Your challenge needs to be submitted 2 weeks from the start date. In the case you do not make it in time, do communicate in advance with your team lead and ensure that you submit it regardless.
